

# Hyperpigmentation Solution

This technologically advanced MandeliClear Peel System is formulated specifically for treating pigmentation irregularities as a result of acne, melasma and environmental damage

A modified Jessner's peel, the MandeliClear contains a combination of 9% mandelic acid, 7% salicylic acid, 7% lactic acid and 7% resorcinol in an ethanol base with quillaja bark. Vitamin A Accelerator at 2.5% retinol is used in conjunction with the MandeliClear Peel to accelerate physical peeling. This treatment is safe, gentle and well tolerated by most skin types. You will immediately notice brighter, more radiant looking skin.
